This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THIS Subject Index to the modern books added to the Library of the British Museum comprises, with certain exceptions, those acquired from September, 1885, to January, 1891; and has, like its predecessor, been prepared by George K. Fortescue, Esq., Assistant-Keeper of Printed Books and Superintendent of the Reading Room. Its object and method of execution, and the improvements introduced since the publication of the former volume, are fully detailed in Mr. Fortescue's preface, and the utility of the work has been tested by the experience of five years. It is therefore only needful to express in this place warm appreciation of the zeal which has prompted, and the industry which has enabled, Mr. Fortescue to accomplish so laborious an undertaking in non-official hours. The total number of entries in the two publications is about 77,000.

R. GARNETT.

PREFACE.

In the year 1886, a Subject Index of the Accessions of recently-published books added to the Library of the British Museum between January, 1880, and August, 1885, was issued. The present volume continues the work from September, 1885, to January, 1891, and contains an Index of the books published during the last ten years which have been added to the Library during the years 1886, 1887, 1888, and 1889, together with the greater part of those received in 1885 and 1890. Works in the Slavonic, Hungarian, Celtic and Oriental languages are not included in either volume.

The primary object of the Index is to assist readers in their researches in the Library of the British Museum; it has not therefore been considered necessary to reproduce such portions of the General Catalogue of Printed Books as are of the nature of a Class Catalogue. Thus, the heading 'Bible' will not be found in the present Index, although a considerable proportion of the Biblical literature of the last five years has been included, under such headings as Christianity, Church History, Jews, etc. For the same reason no personal names have been taken as subject headings, and the heading 'Biography' has been used only for collected biographies, although such individual biographies as serve to illustrate History, Art, or Science have been frequently included, and will be found throughout the work under various subject headings. Novels, poems, plays, and miscellaneous essays are also omitted, and only critical or historical works and selections will be found under such headings as Drama, Fiction, Hymns and Poetry. It should also be noted that when several editions of a book have been published during the period included in the present series, reference has been made only to the latest edition.

The system of arrangement adopted differs in some respects from that of the former volume. Wherever it has been possible, as in the history of each country or subject, a chronological order has been followed; but where no better system has suggested itself, books have been arranged alphabetically, irrespective of the

Digitized by Google

languages in which they are written. It should, however, be clearly understood that the alphabetical order has been departed from whenever it has been thought useful to group together books commenting upon each other or directly bearing upon the same branch of each subject.

The Compiler's thanks are due to many of his colleagues and friends for their assistance and advice; he desires particularly to record his gratitude to Mr. J. Macfarlane, who has afforded him valuable assistance in the preparation of the work for the Press.

G. K. F.

Digitized by Google

NOTE.

Under each country subheadings will be found for works on the National Antiquities, Army, Colonies, Constitution and Government, History, Law, Navy, Politics, Social Life, Topography, Trade and Finance.

Works on the Agriculture, Art, Botany, Education, Folk Lore, Geology, Heraldry and Genealogy, Land Tenure, Mineralogy, Police, Railways, and Typography of each country are treated independently, and will be found under these headings.

Art Galleries, Exhibitions and Libraries have also been grouped together under the headings "Exhibitions and Libraries," and not placed under the countries or towns in which they are situated. In order to save space, cross-references have not been given from each country and town to these subjects.

Many abbreviations have been used throughout the work. Most of these are sufficiently intelligible, but the following may require explanation:—

Ac.	for Academies.
Ephem.	„ Ephemerides.
G. B. and I.	„ Great Britain and Ireland.
P.P.	„ Periodical Publications.
U.S.	„ United States of America.
